REVISION HISTORY	16

INTRODUCTION

St Lawrence College is committed to providing a safe workplace for all staff, students and visitors and fulfilling our obligations under The Health and Safety (First Aid) Regulations 1981 by:

- Providing training for staff in administering first aid according to the risks identified.
- Having First Aid provisions readily available.
- Having a competent “appointed person” available at all times.
- Identifying and reducing risks to acceptable levels through written and dynamic risk assessments which are reviewed regularly.
- Ensuring policies and procedures are in place to safeguard staff and students.
- Recording and reviewing all accidents, incidents and or near miss events
-

St Lawrence College provides a Medical Centre for boarding students, and day students, if necessary, which is situated on the first floor of the Junior School Main Building.

During term time there is a qualified nurse available 24 hours a day, 7 days a week, and when a child falls ill, they should go to the Medical Centre, or the Medical Centre staff should be contacted.

Unless otherwise authorised by the Senior Nurse, all medications are stored securely in, and administered from, the Medical Centre. All visits to the Medical Centre are recorded in the Day Book, which is kept in the Medical Centre.

Specific arrangements are in place for pupils with particular pre-notified medical conditions (e.g., Asthma, Epilepsy and Diabetes) and these pupils are known to the Medical Centre staff, and teaching staff, where considered necessary.

ARRANGEMENTS FOR STUDENTS & STAFF OBTAINING FIRST AID TREATMENT.

- 1.1 In the event of a pupil or staff member feeling unwell or sustaining an injury, a dynamic assessment of the person by a suitably trained person should be immediately carried out and treatment provided to stabilise the patient.
- 1.2 If the injury is non-life-threatening, then the injury should be stabilised using supplies from the nearest First Aid Kit (see Appendix D for locations) before escorting the student to the Medical Centre.
- 1.3 If student/s are required to be escorted to the Medical Centre, they are to be accompanied by a member of staff or a responsible pupil.
- 1.4 The school doctors will offer consultations as required by the College. If a pupil needs a consultation this may be offered by video link or in person at the Medical Centre or surgery. If the situation is considered urgent and it is deemed necessary, arrangements will be made for the pupil to be taken to hospital.
- 1.5 During holiday times the Medical Centre is not staffed. Therefore, it is important that there are sufficient members of staff trained in First Aid in each department, to cover any emergency that may arise.
- 1.6 If a member of staff is feeling unwell or sustains an injury, they should contact the nearest first aider who will administer first aid treatment as required. Line Managers are required to be notified of all injuries to staff.

INFORMING PARENTS / STAFF EMERGENCY CONTACT

- 1.7 Parents will always be contacted if a pupil suffers anything more than a trivial injury, or is unwell and admitted to the Medical Centre, or there are any concerns about their health.
- 1.8 In the event a staff member becomes unwell or is injured whilst at work and is unable to continue working, the Line Manager or designated person will decide if the emergency contact is required to be notified. Arrangements for the safe transportation of the staff member to their place of residence will be discussed with the staff member where required.

PUPIL AND STAFF RECORDS

- 1.9 All boarders' medical records are kept securely in the Medical Centre. Information regarding pupils with medical conditions that all staff should be aware of is available on SharePoint.
- 2.0 All staff medical records are held with the HR Department

RECORDING OF ACCIDENTS

- 2.1 All accidents must be recorded in full on the accident report form by the adult or staff member present, or first aider.

Accident forms must be submitted to the Medical Centre and Health and Safety Department within 24 hours.

Any incident or accident that requires a person to go to A&E for any treatment, the Health and Safety department should be notified as soon as practically possible.

Accident forms are completed electronically and then sent to the relevant people. They may also be put on the appropriate Teams site.

For pupils who sustain an injury which requires medical attention the completed accident report form should be made available to the Medical Centre when presenting for treatment where the detail will be concluded.

- 2.2 In the Junior School, parents will be informed in writing of any accidents or injuries sustained by a child in line with specific EYFS requirements and of any first aid treatment given. Acknowledgement must be sought by the parent signing and returning the said letter.
- 2.3 The Compliance Manager will take all the necessary steps to comply with the Reporting of Injury, Diseases and Dangerous Occurrence Regulations 2013 (RIDDOR) informing the Health and Safety Executive (HSE) as necessary.
- 2.4 RIDDOR report forms are submitted electronically to the Health and Safety Executive by the Compliance Manager upon receipt of a reportable, Injury Disease, Dangerous Occurrences. RIDDOR acknowledgements together with a copy report are retained by the Health and Safety Department. The detail of all incidents/accidents are retained by the Health and Safety Department, reviewed and investigated. Statistical detail as a result of accidents/incidents/diseases/dangerous occurrences is collated and submitted to the (SLC) Health and Safety Committee when it meets quarterly, by way of the Health and Safety Scorecard.

EMERGENCY PROCEDURES

- 1.15 Upon being summoned in the event of an accident, the medical practitioner/first aider is to take charge of the emergency treatment/first aid treatment commensurate with their training. Following their triage/assessment of the injured person, they are to administer appropriate treatment/first aid and make a balanced judgement as to whether there is a requirement to call an ambulance.

The medical practitioner/first aider is to always call an ambulance on the following occasions:

CALLING FOR AN AMBULANCE

- 1.15.1 An ambulance should always be called:

- If the patient has stopped breathing
- In the event of a serious injury.
- Any significant head injury.
- Any period of unconsciousness.
- In the event of a serious asthma attack or allergic reaction

- If you suspect a cardiac arrest or stroke.
- Whenever the first aider is unsure of the severity of the injuries and/or unsure of the correct treatment in the absence of SLC medically trained staff

Where there is a possibility of a fracture or where this is suspected, an assessment will be made by the First Aider on site as to whether it will be more expedient to drive the pupil to the hospital, rather than call an ambulance.

TRIPS OUT OF SCHOOL

- 1.10 The Medical Centre should be made aware of all pupils attending an educational visit, to enable them to discuss any particular medical needs with the member of staff in charge of the trip. It is also the responsibility of the member of staff in charge to provide the Medical Centre with a list of all pupils participating and to be aware of any particular medical conditions (for example, asthma, epilepsy, diabetes) affecting pupils. The member of staff should also ensure they have a fully stocked first aid kit available for the trip.

See Educational Visits Policy

SPORTING ACTIVITIES

SPORTS FIELD

- 1.11 The person responsible for taking games must have access to a first aid kit at all times. All first aid kits must be returned to Medical Centre after the last games session of the term, to allow for a complete audit and the replenishment as necessary. Any item used should be replaced as soon as possible after use.
- 1.12 It is also advisable for a least one member of staff to have a mobile phone with them to enable them to call for help/ambulance if the injury is too serious for the patient to be moved.
- 1.13 Pupils sustaining injuries on the sports field may be taken to the Medical Centre (if deemed safe to do so) for assessment unless an ambulance or paramedics have been called.

RUGBY MATCHES

- 1.14 A member of the Medical Centre staff will be at pitch side for home rugby matches whenever possible.

Suspected Concussion

- 1.15.2. Pupils sustaining injuries on the sports field may be taken to the Medical Centre (if deemed safe to do so) for assessment unless an ambulance or paramedics have been called.

Please note, helpful advice when dealing with concussion can be found on the link NHS link below:

PROCEDURE FOR DEALING WITH THE SPILLAGE OF BODILY FLUIDS

Personal Protective Equipment (PPE)

1.17 Disposable gloves (non-latex) and all relevant PPE, as detailed in the relevant Risk Assessment, must be worn where there is the potential/likelihood of contamination from body fluids, to ensure safe systems of work. The appropriate Spill Kits are in place across the SLC site and managed by the Medical Centre and the Domestic Services Manager.

The contamination of surfaces/floor surfaces

1.18 Contaminated surfaces must be contained by deploying the appropriate spills kit (Bodily Fluids) the kit will contain absorbent granules which should be sprinkled initially around the spill to prevent it from travelling thereafter to cover and contain the spill. Once the spill has been contained by the granules this can be removed with care using the correct PPE with the designated dustpan and brush. The spill material to be disposed of in a yellow hazardous waste plastic bag, which will be collected by the hazardous waste contractor. Following the clean-up operation, the area should be cleaned following (SLC) protocol.

1.19 The use of Adrenaline Auto-Injectors such as: EpiPen, Jext, Emerade

Auto injectors are automatic injection devices containing adrenaline for allergic emergencies. The auto injectors should only be used by a person with a history or an acknowledged risk of an anaphylactic reaction. Anaphylaxis may be caused by insect stings or bites, food, drugs and other

allergens as idiopathic (the latter a symptom or syndrome that appears without apparent cause), or exercise-induced anaphylaxis. It is the policy of SLC that every pupil with a known medical condition will have an individual health care plan in place, if the condition warrants it, which is held on file within the medical centre and shared with each member of the medical team and all other relevant staff. Prescription only medicines (poms) must not be administered unless they have been prescribed for a child by an Appropriate Practitioner such as a doctor, nurse, and pharmacist. All adults working within SLC must ensure that they disclose to key personal any such personal medical care plans, as to ensure that crucial risk factors information is available to the medical team, should medical intervention be required or indeed an emergency services response. Guidance recommends that individuals carry a second auto-injection should the first fail for any reason. Care must be taken by the parent to ensure auto-injectors remain within date and therefore fit for purpose. Individual staff reliant upon an auto-injector share the same responsibility.

Sharps Injury

- 1.20 Anyone who receives a sharps injury must go to the Medical Centre immediately. The College will hold a record of the sharps injury and investigate the circumstances and causes of the incident and take action if required. The record of injury should include who was injured, and when and where the incident occurred.

Sharps boxes are available throughout the CPC for the purpose of the disposal of sharp apparatus, such as scalpels. Clinical Sharps boxes are also within the Medical Centre. SLC has an arrangement with a specialist contractor for the regulatory collection and disposal of sharps.

Disposal of Sharps

- Extreme care must be taken into consideration when disposing of sharps waste.
- Contaminated needles and other contaminated sharps should not be bent or recapped.
- Pick up the sharp object by using a dustpan and brush or tweezers.
- Both needles and blades are always treated and handled with the highest concern.
- Contain all sharps and needles immediately in a leak-proof container (be-spoke sharps box) that is appropriately labelled.
- All sharps' containers must meet the following criteria: closable, puncture resistant and leak-proof.
- Notify the School Medical Centre.
- The Medical Centre, in addition to the Cannon Perfect Centre (CPC), have ample sharps boxes for the safe disposal of sharps.
- (SLC) have a contract in place with a Regulated Waste Disposal Company, Sharps Bins/Hazardous Waste (yellow bags) are collected and disposed of at agreed intervals or, as/when required.

NON-URGENT APPOINTMENTS

- 1.21 Pupils who have to attend appointments will have their transport arranged by the Medical Centre. House staff will be informed via email, of the date, time and location of pick up by the escort. All pupils under the age of 16 will go with an escort. Those over 16 can go unattended at the discretion of the Medical Centre and Housemaster/Housemistress, dependent on the type of appointment they are attending.

TRAINING AND MONITORING

1.22 It is important that there are sufficient numbers of staff trained in first aid.

St Lawrence College will monitor the qualifications of all the First Aiders and ensure that they are offered the appropriate refresher training every three years, which will comply with HSE requirements.

St Lawrence College publishes a list of qualified First Aiders. **See APPENDIX A**
[Appendix A \(First Aid Policy\) Training .xlsx](#)

The following First Aid certification is available dependent upon risk factors.

- Emergency First Aid at Work, a one-day training course
- 2 Day Paediatric First Aid
- First Aid at Work, a 3-day training course
- 2 Day Refresher

MENTAL HEALTH FIRST AIDERS (YOUTH) - MEDICAL STAFF

1.23 SLC fully supports the training of Mental Health First Aiders and has a number of members of staff fully trained as Youth Mental Health First Aiders and others as Adult Mental Health First Aiders. This measure will add both resilience and support where required.

See APPENDIX B

[Appendix B \(First Aid Policy\) Mental Health Training .xlsx](#)

TRAINING FOR EARLY YEARS STAFF –

1.24 At least one person who has a current Paediatric First Aid (PFA) certificate must be on the premises and available at all times when children are present and must accompany children on outings. The certificate must be for a full course, consistent with the criteria set out in Appendix G. Child minders, and any assistant who might be in sole charge of the children for any period of time, must hold a full current PFA certificate. PFA training must be renewed every three years and be relevant for workers caring for young children. The College takes into account the number of children, staff and the layout of premises to ensure that a Paediatric First Aider is able to respond to emergencies quickly. All newly qualified Early Years teaching staff who have completed a Level 2 or Level 3 qualification on or after 30 June 2016 must also have either a full PFA certificate or an emergency PFA certificate within 3 months of starting work at the College, in order to be included in the required child / staff ratios at Level 2 or Level 3 in the Early Years setting. Upon request, the College will make available to parents a list of staff who have a current PFA certificate.

See APPENDIX A

[Appendix A \(First Aid Policy\) Training .xlsx](#)

FIRST AID EQUIPMENT

- 1.25 It is the responsibility of each head of department to allocate a named person to ensure that suitable stocked and properly identified containers are easily accessible and placed, if possible next to or near hand-washing facilities. Replenishments are ordered using the SLC First Aid Kit replenishment order form, see **APPENDIX C**
[Appendix C \(First Aid Policy\) First Aid equipment replenishment.url](#)
- 1.26 All first aid kits MUST be identified by a white cross on a green background.

FIRST AID KITS

- 1.27 The contents of the First Aid Kits should be checked in each department, and any shortfalls restocked frequently by a named member of staff, appointed by the head of department. At all times the contents should be replaced as soon as possible after each use.
 For locations of First Aid Kits, see **APPENDIX D**
[Appendix D \(First Aid Policy\)First Aid Box location & kit checks.xlsx](#)

Standard First Aid Kit

It is recommended that First Aid Containers should contain the following:

First Aid Contents
Disposable gloves
3 Large wound dressings
3 Medium Wound dressings
2 Eye pads
1 yellow bag
4 Eyewash pods
5 Large steropore dressings
5 Small steropore dressings
4 NA Dressings
Vent Aid
10 Alcohol wipes
Assorted plasters
Micropore tape
1 ice pack
1 Triangular bandage
1 Large crepe bandage
1 Medium crepe bandage

Additionally, each first aid box should contain a face shield as a PPE protection measure.

The Medical Centre holds 10 mobile kits for use on external visits.

It is the responsibility of all heads of departments to allocate a named person if not the first aider, to

ensure that the first aid kits are regularly checked, and any shortfalls are re-stocked by contacting the Medical Centre.

Notes: The above is only a recommendation from the HSE, as there is no mandatory list of items.

Please refer to your Departmental Risk Assessment as to whether an eye wash station is required for the type of hazards exposed to in keeping with the required control measures

1.32 Locations of Defibrillators

It is the responsibility of the Health and Safety Assistant to ensure that the Defibrillators are regularly checked, and any problems reported to the Medical centre, Health and Safety Manager.

see **APPENDIX E**

[Appendix E \(First Aid Policy\) Defibrillator locations.xlsx](#)

1.33 APPENDIX F

Use of Defibrillator Report Form

Date: ____/____/____

Patient Details:

Male Female Age _____ Known Estimated Unknown

Full Name (if known) _____

Location of Collapse (please be specific) _____

Time & date of Collapse (please estimate if exact time not known) _____

Was the Collapse witnessed? Yes No Unknown

If yes, please state name(s) of witness(S) _____

Had CPR been started before the defibrillator arrived? Yes No Unknown

What was the delay time between the patient collapsing and the start of CPR being administered? _____
(Minutes) Actual Estimated Unknown

What Time was the Ambulance called? _____

What was the delay between collapse and placing the electrodes on the patient's chest?

_____ (Minutes) Actual Estimated Unknown

Was shock given? Yes No Unknown

If yes, how many were given before the ambulance arrived? _____

Did the patient have signs of circulation after shock was given? _____

Did the patients start breathing or recover consciousness before the ambulance arrived? _____

Name of the Hospital patient transferred to: _____

If followed up, was the patient.

Dead on Arrival

Admitted but did not survive.

Discharged

Unknown

Additional Information

Please complete this form immediately after the incident and return it to the Health and Safety Department.

1.34 APPENDIX G

CRITERIA FOR EFFECTIVE PAEDIATRIC FIRST AID (PFA) TRAINING

1. Training is designed for workers caring for young children in the absence of their parents and is appropriate to the age of the children being cared for.
2. Following training, an assessment of competence leads to the award of a certificate.
3. The certificate must be renewed every three years.
4. Adequate resuscitation and other equipment including baby and junior models must be provided, so that all trainees are able to practice and demonstrate techniques.
5. The **emergency PFA course** should be undertaken face to face and last for a minimum of 6 hours (excluding breaks) and cover the following areas:
 - Be able to assess an emergency situation and prioritise what action to take.
 - Help a baby or child who is unresponsive and breathing normally.
 - Help a baby or child who is unresponsive and not breathing normally.
 - Help a baby or child who is having a seizure.
 - Help a baby or child who is choking.
 - Help a baby or child who is bleeding.
 - Help a baby or child who is suffering from shock caused by severe blood loss (hypovolemic shock).
6. The full PFA course should last for a minimum of 12 hours (excluding breaks) and cover the areas set out in paragraph 5 as well as the following areas:
 - Help a baby or child who is suffering from anaphylactic shock.
 - Help a baby or child who has had an electric shock.
 - Help a baby or child who has burns or scalds.
 - Help a baby or child who has a suspected fracture.
 - Help a baby or child with head, neck or back injuries.
 - Help a baby or child who is suspected of being poisoned.
 - Help a baby or child with a foreign body in the eyes, ears or nose.
 - Help a baby or child with an eye injury.
 - Help a baby or child with a bite or sting.
 - Help a baby or child who is suffering from the effects of extreme heat or cold.
 - Help a baby or child having: a diabetic emergency; an asthma attack; an allergic reaction; meningitis; and/or febrile convulsions.
 - Understand the role and responsibilities of the paediatric first aider (including appropriate contents of a first aid box and the need for recording accidents and incidents)
7. Providers should consider whether paediatric first aiders need to undertake annual refresher training, during any three-year certification period to help maintain basic skills and keep up to date with any changes to PFA procedures.

Appendix H. Implementation

The policy will be disseminated in a range of methods and styles to ensure a wide coverage, including the use of:

- SharePoint
