REVISION	26

INTRODUCTION

St Lawrence College will provide timely and competent administration of first aid and will implement this policy effectively if someone becomes unwell or is injured, whether as a result of work-related activity or not, ensuring that the College complies with the DfE publication: Guidance on First Aid in Schools (February 2014).

Medical treatment should be provided promptly and efficiently. First aid can save lives and prevent minor injuries becoming major ones. Specific arrangements are in place for pupils with particular pre-notified medical conditions (e.g. Asthma, Epilepsy and Diabetes) and these pupils are known to the Medical Centre staff.

St Lawrence College has its own Medical Centre, which is situated on the first floor of the Junior School Main Building. During term time there is a qualified nurse available 24 hours a day, 7 days a week, and if possible the patient should go to the Medical Centre or the Medical Centre staff should be called. Unless otherwise authorised by the Senior Nurse, all medications are stored securely in, and administered from, the Medical Centre.

All visits to the Medical Centre are recorded in the Day Book, which is kept in the Medical Centre.

The Health and Safety (First-Aid) Regulations 1981, as amended applies.

Coronavirus (Covid-19) Addendum Guidance

The principles as set out in this policy remain unchanged. This addendum should not be used in isolation as a standalone document but read in conjunction with the Coronavirus Health and Safety Policy v2.2, which can be found at Appendices H. The Coronavirus Health and Safety Policy sets out the expectations for St Lawrence College, its pupils, staff and all relevant persons, in light of (Covid-19), during a global pandemic. There is a need for all persons attending St Lawrence College to behave differently in keeping with Government/Public Health England (PHE)/DFE guidelines. An adherence to new systems and procedures is essential in protecting all persons attending St Lawrence College and the wider community. Employers must protect workers from injury or harm to health which could happen as a result of work-related activity. This includes taking reasonable steps to protect SLC staff and others from Coronavirus (Covid-19). It should be noted that where face coverings is the choice of protection by staff or pupils they are not considered by the regulator to be PPE as they do not protect people from work related hazards. They may be marginally beneficial as a precautionary measure against Coronavirus. Please refer to page 8, section 1.18, in relation to (Covid-19) Guidance: Resuscitation Council UK position on COVID-19, September 2020, to ensure safe systems of work are maintained.

ARRANGEMENTS FOR OBTAINING FIRST AID TREATMENT

- 1.1 In the event of a pupil or member of staff feeling unwell or sustaining an injury, they will be escorted to the Medical Centre by a member of staff or a responsible pupil. If the injury is non-life-threatening, then the injury should be stabilised using supplies from the nearest First Aid Kit (see Appendix C for locations) before escorting the person to the Medical Centre.
- 1.2 The school doctors will offer consultations as required by the School. If a pupil needs a consultation this may be offered by video link or in person at the Medical Centre or surgery. If the situation is considered urgent and it is deemed necessary, the pupil will be taken to hospital.
- 1.3 During holiday times the Medical Centre is not staffed. Therefore it is important that there are sufficient members of staff trained in First Aid in each department, to cover any emergency that may arise.

INFORMING PARENTS

- 1.4 Parents will always be contacted if a pupil suffers anything more than a trivial injury, or is unwell and admitted to the Medical Centre, or there are any concerns about their health.

PUPIL RECORDS

- 1.5 All boarders' medical records are kept securely in the Medical Centre. Information regarding pupils with medical conditions that all staff should be aware of is circulated to staff at the start of each year. A list detailing all the information is retained in the Medical Centre and is also available in the Staff Common Rooms.

RECORDING OF ACCIDENTS

- 1.6 All accidents, no matter how trivial, should be recorded by the adult present at the time, on an accident report form available from the Bursary in the senior school building, additionally the accident report form is available from the college intranet, Firefly. For pupils who sustain an injury which requires medical attention the completed accident report form should be made available to the Medical Centre when presenting for treatment where the detail will be concluded. Copies must then be given to the Deputy Head, Pastoral, and the relevant Housemaster/Housemistress, the member of staff present with the pupil at time of the injury and the Health and Safety Department.
- 1.7 In the Junior School, parents will be informed in writing of any accidents or injuries sustained by a child in line with specific EYFS requirements and of any first aid treatment given. Acknowledgement must be sought by the parent signing and returning the said letter.
- 1.8 The Health and Safety Manager will take all the necessary steps to comply with the Reporting of Injury, Diseases and Dangerous Occurrence Regulations 2013 (RIDDOR) informing the Health and Safety Executive (HSE) as necessary.
- 1.9 RIDDOR report forms are submitted electronically to the Health and Safety Executive by the Health and Safety Manager upon receipt of a reportable; Injury Disease, Dangerous Occurrences. RIDDOR acknowledgements together with a copy report are retained by the Health and Safety Department. The detail of all incidents/accidents are retained by the Health and Safety Department, reviewed and investigated. Statistical detail as a result of accidents/incidents/diseases/dangerous occurrences is collated and submitted to the (SLC) Health and Safety Committee when it meets quarterly, by way of the Health and Safety Scorecard.

TRIPS OUT OF SCHOOL

- 1.10 The Medical Centre should be made aware of all pupils attending an educational visit, to enable them to discuss any particular medical needs with the member of staff in charge of the trip. It is also the responsibility of the member of staff in charge to provide the Medical Centre with a list of all pupils participating and to be aware of any particular medical conditions (for example, asthma, epilepsy, diabetes) affecting pupils. The member of staff should also ensure they have a fully stocked first aid kit available for the trip.

See Educational Visits Policy.

SPORTING ACTIVITIES

SPORTS FIELD

- 1.11 The person responsible for taking games must have a first aid kit with them at all times. All first aid kits must be returned to Medical Centre after the last games session of the term, to allow for a complete audit and the replenishment as necessary. Any item used should be replaced as soon as possible after use.
- 1.12 It is also advisable for a least one member of staff to have a mobile phone with them to enable them to call for help/ambulance if the injury is too serious for the patient to be moved.
- 1.13 All pupils sustaining injuries on the sports field will be taken to the Medical Centre (if deemed safe to do so) for assessment unless an ambulance or paramedics have been called.

RUGBY MATCHES

- 1.14 A member of the Medical Centre staff will be at pitch side for home rugby matches whenever possible.

EMERGENCY PROCEDURES

1.15 Upon being summoned in the event of an accident, the medical practitioner/first aider is to take charge of the emergency treatment/first aid treatment commensurate with their training. Following their triage/assessment of the injured person, they are to administer appropriate treatment/first aid and make a balanced judgement as to whether there is a requirement to call an ambulance

The medical practitioner/first aider is to always call an ambulance on the following occasions:

CALLING FOR AN AMBULANCE

1.15.1 An ambulance should always be called:

- If the patient has stopped breathing
- In the event of a serious injury;
- Any significant head injury;
- Any period of unconsciousness;
- In the event of a serious asthma attack or allergic reaction
- Wherever there is a possibility of a fracture or where this is suspected
- If you suspect a cardiac arrest or stroke.
- Whenever the first aider is unsure of the severity of the injuries and/or unsure of the correct treatment in the absence of SLC medically trained staff
- If the patient has stopped breathing.

Suspected Concussion

1.15.2. Concussion is a temporary injury to the brain caused by a bump, blow or jolt to the head. It usually only lasts up to a few days or weeks, although it sometimes needs emergency treatment and some people can have longer-lasting problems. Procedures as laid down in this policy as at 1.14 and 1.15 must be followed as all times.

Please note: helpful advice when dealing with concussion can be found on the link NHS link below:

PROCEDURE FOR DEALING WITH THE SPILLAGE OF BODILY FLUIDS

Personal Protective Equipment (PPE)

- 1.17 Disposable gloves (Non Latex) and all relevant PPE, as detailed in the relevant Risk Assessment, must be worn where there is the potential/likelihood of contamination from body fluids, to ensure safe systems of work. The appropriate Spill Kits are in place across the SLC site and managed by the Medical Centre and the Domestic Services Manager.
- 1.17.1 During the period of the Coronavirus Pandemic Covid-19, three isolation rooms have been specifically identified across the college site, where symptomatic pupils will be taken in order to control exposure. The isolation rooms are equipped with the required PPE, to include overalls/over shoe covers/visors/facemask/disposable gloves/aprons/disinfectant wipes and spray/bodily fluid spill kits. A member of the medical staff will be alerted and will attend the isolation room.
- 1.17.2 Boarding House isolation rooms have been identified in order to accommodate pupils returning from countries outside the UK that require a period of isolation. Full PPE equipment as at 1.17.1 is also in place.
- 1.18 **Resuscitation Council UK position on COVID-19 guidance in September 2020**

Resuscitation Council UK Statement on Covid-19 in relation to CPR and resuscitation in First Aid and Community settings:

Please refer to video by opening the link below:

<https://www.resus.org.uk/covid-19-resources/covid-19-resources-general-public/resuscitation-council-uk-statement-covid-19>

1.18.1 Guidance for First Aiders

Try to assist at a safe distance from the casualty as much as you can and minimise the time you share a breathing zone.

If they are capable, tell them to do things for you, but treating the casualty properly should be your first concern.

Remember the 3P model – Preserve life, Prevent worsening, Promote recovery.

Preserve life: CPR

- Call 999 immediately – tell the call handler if the patient has any COVID-19 symptoms
- Ask for help. If a portable defibrillator is available, **ask for it**
- Before starting CPR, to minimise transmission risk, *use a cloth or towel* to cover the patient's mouth and nose, while still permitting breathing to restart following successful resuscitation

If available, use:

- a fluid-repellent surgical mask
- disposable gloves
- eye protection
- apron or other suitable covering

- **Only deliver CPR by chest compressions and use a defibrillator (if available) – do not attempt rescue breaths**

Prevent Worsening and Promote Recovery: all other injuries or illnesses

- If you suspect a serious illness or injury, call 999 immediately – tell the call handler if the patient has any *COVID-19 symptoms*
- If giving first aid to someone, you should use the recommended equipment listed above if it is available
- You should minimise the time you share a breathing zone with the casualty and direct them to do things for you where possible
- **After delivering any first aid**
 - *Ensure you safely discard disposable items and clean reusable ones thoroughly.*
 - *Wash your hands thoroughly with soap and water or an alcohol-based hand sanitizer as soon as possible.*

Contact the Domestic Services Manager who will arrange for a full clean of the location where Covid-19 is suspected. Domestic Services Manager:

Work Mobile 07783368646

Email - cas@slcuk.com

The contamination of surfaces/floor surfaces

- 1.19 Contaminated surfaces must be contained by deploying the appropriate spills kit (Bodily Fluids) the kit will contain absorbent granules which should be sprinkled initially around the spill to prevent it from travelling thereafter to cover and contain the spill. Once the spill has been contained by the granules can be removed with care using the correct PPE with a designated dustpan and brush. The spill material to be disposed of in a yellow hazardous waste plastic bag, which will be collected by the hazardous waste contractor. Following the clean-up operation the area should be cleaned following (SLC) protocol.

1.20 The use of Adrenaline Auto-Injectors such as: EpiPen, Jext, Emerade

Auto injectors are automatic injection devices containing adrenaline for allergic emergencies. The auto injectors should only be used by a person with a history or an acknowledged risk of an anaphylactic reaction. Anaphylaxis may be caused by insect stings or bites, food, drugs and other allergens as idiopathic (the latter a symptom or syndrome that appears without apparent cause), or exercise-induced anaphylaxis. It is the policy of SLC that every pupil with a known medical condition will have an individual health care plan in place which is held on file within the medical centre and shared with each member of the medical team and all other relevant staff. Prescription only medicines (poms) must not be administered unless they have been prescribed for a child by an Appropriate Practitioner such as a doctor, nurse, and pharmacist. All adults working within SLC must ensure that they disclose to key personal any such personal medical care plans, as to ensure that crucial risk factors information is available to the medical team, should medical intervention be required or indeed an emergency services response. Guidance recommends that individuals carry a second auto-injection should the first fail for any

reason. Care must be taken by the parent to ensure auto-injectors remain within date and therefore fit for purpose. Individual staff reliant upon an auto-injector share the same responsibility.

Sharps Injury

- 1.21 Anyone who receives a sharps injury must go to the Medical Centre immediately. The College will hold a record of the sharps injury and investigate the circumstances and causes of the incident and take action if required. The record of injury should include who was injured, and when and where the incident occurred.

Sharps boxes are available throughout the CPC for the purpose of the disposal of sharp apparatus, such as scalpels. Clinical Sharps boxes are also within the Medical Centre. SLC has an arrangement with a specialist contractor for the regulatory collection and disposal of sharps.

Disposal of Sharps

- Extreme care must be taken into consideration when disposing of sharps waste.
- Contaminated needles and other contaminated sharps should not be bent or recapped;
- Pick up the sharp object by using a dust pan and brush or tweezers;
- Both needles and blades are always treated and handled with the highest concern;
- Contain all sharps and needles immediately in a leak-proof container (be-spoke sharps box) that is appropriately labelled;
- All sharps containers must meet the following criteria: closable, puncture resistant and leak-proof;
- Notify the School Medical Centre;
- The Medical Centre, in addition to the Cannon Perfect Centre (CPC), have ample sharps boxes for the safe disposal of sharps.
- (SLC) have a contract in place with a Regulated Waste Disposal Company, Sharps Bins/Hazardous Waste (yellow bags) are collected and disposed of at agreed intervals or, as/when required.

NON-URGENT APPOINTMENTS

- 1.22 Pupils who have to attend appointments will have their transport arranged by the Medical Centre. House staff will be informed via email, of the date, time and location of pick up by the escort. All pupils under the age of 16 will go with an escort. Those over 16 can go unattended at the discretion of the Medical Centre and Housemaster/Housemistress, dependant on the type of appointment they are attending.

TRAINING AND MONITORING

- 1.23 It is important that there are sufficient numbers of staff trained in first aid.

St Lawrence College will monitor the qualifications of all the First-Aiders and ensure that they are offered the appropriate refresher training every three years, which will comply with HSE requirements.

St Lawrence College publishes a list of qualified First-Aiders. See Appendix (A)

The following First Aid certification is available dependent upon risk factors

- Emergency First Aid at Work, a one day training course
- 2 Day Paediatric First Aid

- First Aid at Work, a 3 day training course
- 2 Day Refresher

MENTAL HEALTH FIRST AIDERS (YOUTH) - MEDICAL STAFF

- 1.24 (SLC) fully supports the training of Mental Health First Aiders to this end, the college has embarked upon this new initiative which will see 5 members of staff fully trained by the start of the Michaelmas Term 2019 . This measure will add both resilience and support where required.

TRAINING FOR EARLY YEARS STAFF

- 1.25 At least one person who has a current Paediatric First Aid (PFA) certificate must be on the premises and available at all times when children are present and must accompany children on outings. The certificate must be for a full course, consistent with the criteria set out in Appendix D. Child minders, and any assistant who might be in sole charge of the children for any period of time, must hold a full current PFA certificate. PFA training must be renewed every three years and be relevant for workers caring for young children. The College takes into account the number of children, staff and the layout of premises to ensure that a Paediatric First Aider is able to respond to emergencies quickly. All newly-qualified Early Years teaching staff who have completed a Level 2 or Level 3 qualification on or after 30 June 2016 must also have either a full PFA certificate or an emergency PFA certificate within 3 months of starting work at the College, in order to be included in the required child / staff ratios at Level 2 or Level 3 in the Early Years setting. The College will make available upon request to parents, a list of staff who have a current PFA certificate.

FIRST AID EQUIPMENT

- 1.26 It is the responsibility of each head of department to allocate a named person to ensure that suitable stocked and properly identified containers are easily accessible and placed, if possible next to or near hand-washing facilities.
- 1.27 All first aid kits **MUST** be identified by a white cross on a green background.

FIRST AID KITS

- 1.28 The contents of the First Aid Kits should be checked in each department, and any shortfalls restocked frequently by a named member of staff, appointed by the head of department. At all times the contents should be replaced as soon as possible after each use. For locations of First Aid Kits, see Appendix C

Standard First Aid Kit

It is recommended that First Aid Containers should contain the following:

First Aid Guidance Note	1
Adhesive Plasters, individually wrapped (assorted sizes)	20
Eye Pads	2
Triangular Bandages	4
Safety Pins	6
Medium sized (12cm x 12cm) sterile un-medicated wound dressings	6
Large (18cm x 18cm) sterile un-medicated wound dressings	2
Disposable Gloves (pair) Non Latex	1
Face shield Protection	2

Notes:

The above is only a recommendation from the HSE, as there is no mandatory list of items. Additionally, each first aid box should contain a face shield as a PPE protection measure

Please refer to your Departmental Risk Assessment as to whether an eye wash station is required for the type of hazards exposed to in keeping with the required control measures.

Use of Defibrillator Report Form

Date: ____/____/____

Patient Details:

Male ☐ Female ☐ Age _____ Known ☐ Estimated ☐ Unknown ☐

Full Name (if Known) _____

Location of Collapse (please be specific) _____

Time of Collapse (please estimate if exact time not known) _____

Was the Collapse witnessed? Yes ☐ No ☐ Unknown ☐

If yes, please state name(s) of witness(S) _____

Had CPR been started before the defibrillator arrived? Yes ☐ No ☐ Unknown ☐

What was the delay time between the patient collapsing and the start of CPR being administered?
_____ (Minutes) Actual Estimated ☐ Unknown ☐

What Time was the Ambulance called? _____

What was the delay between collapse and placing the electrodes on the patient's chest?

_____ (Minutes) Actual ☐ Estimated ☐ Unknown ☐

Was shock given? Yes ☐ No ☐ Unknown ☐

If yes, how many were given before the ambulance arrived? _____

Did the patient have signs of circulation after shock was given? _____

Did the patients start breathing or recover consciousness before the ambulance arrived? _____

Name of the Hospital patient transferred to: _____

If followed up, was the patient

Dead on Arrival ☐

Admitted but did not survive ☐

Discharged ☐

Unknown ☐

Additional Information

Please complete this form immediately after the incident and return it to the Health and Safety /Facilities Manager (SFM).

1.34 APPENDIX F

CRITERIA FOR EFFECTIVE PAEDIATRIC FIRST AID (PFA) TRAINING

1. Training is designed for workers caring for young children in the absence of their parents and is appropriate to the age of the children being cared for.
2. Following training, an assessment of competence leads to the award of a certificate.
3. The certificate must be renewed every three years.
4. Adequate resuscitation and other equipment including baby and junior models must be provided, so that all trainees are able to practice and demonstrate techniques.
5. The **emergency PFA course** should be undertaken face to face and last for a minimum of 6 hours (excluding breaks) and cover the following areas:
 - Be able to assess an emergency situation and prioritise what action to take.
 - Help a baby or child who is unresponsive and breathing normally.
 - Help a baby or child who is unresponsive and not breathing normally.
 - Help a baby or child who is having a seizure.
 - Help a baby or child who is choking.
 - Help a baby or child who is bleeding.
 - Help a baby or child who is suffering from shock caused by severe blood loss (hypovolemic shock).
6. The full PFA course should last for a minimum of 12 hours (excluding breaks) and cover the areas set out in paragraph 5 as well as the following areas:
 - Help a baby or child who is suffering from anaphylactic shock.
 - Help a baby or child who has had an electric shock.
 - Help a baby or child who has burns or scalds
 - Help a baby or child who has a suspected fracture.
 - Help a baby or child with head, neck or back injuries.
 - Help a baby or child who is suspected of being poisoned.
 - Help a baby or child with a foreign body in the eyes, ears or nose.
 - Help a baby or child with an eye injury.
 - Help a baby or child with a bite or sting.
 - Help a baby or child who is suffering from the effects of extreme heat or cold.
 - Help a baby or child having: a diabetic emergency; an asthma attack; an allergic reaction; meningitis; and/or febrile convulsions.

- Understand the role and responsibilities of the paediatric first aider (including appropriate contents of a first aid box and the need for recording accidents and incidents)
7. Providers should consider whether paediatric first aiders need to undertake annual refresher training, during any three-year certification period to help maintain basic skills and keep up to date with any changes to PFA procedures.

Appendix G. Implementation

The policy will be disseminated in a range of methods and styles to ensure a wide coverage, including the use of:

- Sharepoint
